

Instructions on how to enable JavaScript Support on your Browser:

Windows Internet Explorer Browser

Note To allow scripting on this Web site only, and to leave scripting disabled in the Internet zone, add this Web site to the Trusted sites zone.

1. On the **Tools** menu, click **Internet Options**, and then click the **Security** tab.
2. Click the **Internet** zone.
3. If you do not have to customize your Internet security settings, click **Default Level**. Then do step 4.
If you have to customize your Internet security settings, follow these steps:
 - a. Click **Custom Level**.
 - b. In the **Security Settings - Internet Zone** dialog box, click **Enable for Active Scripting** in the **Scripting** section.
4. Click the **Back** button to return to the previous page, and then click the **Refresh** button to run scripts.

Firefox Browser

1. On the **Tools** menu, click **Options**.
2. On the **Content** tab, click to select the **Enable JavaScript** check box.
3. Click the **Go back one page** button to return to the previous page, and then click the **Reload current page** button to run scripts.

Opera Browser

1. On the **Tools** menu, click **Preferences**.
2. On the **Advanced** tab, click **Content**.
3. Click to select the **Enable JavaScript** check box, and then click **OK**.
4. Click the **Back** button to return to the previous page, and then click the **Reload** button to run scripts.

Netscape Browser

1. Select **Edit, Preferences, Advanced**.
2. Click to select **Enable JavaScript** option.
